

WRAP IT BEFORE YOU TOUCH IT

Remember when touch felt safe? When you never had to give what you touched a second thought? Microbes, like the coronavirus and bacteria, such as listeria, and salmonella, spread on surfaces that we touch every day. When we come into contact with these surfaces, we are at risk of contamination and of becoming carriers.

INTRODUCING

Hygiene Zone I Anti-microbial Film
Developed by HEXIS HEALTH in France

A transparent, invisible film containing anti-microbial agents, coated with a pressure sensitive acrylic adhesive.

Designed for microbial protection of surfaces in areas that require a significant level of hygiene, such as workplaces and offices, community healthcare, educational institutions, gyms and fitness centers, retail and wholesale, restaurants, banks, hairdressers and salons, homes, hotels, airports, train stations and public transport.

- Kills 99.99% of harmful bacteria
- Proven effective against Coronavirus
- Self-cleaning action: saves on cleaning products
- Lasts up to 5 years in most environments
- Tested in global hostile medical environments
- Transparent and invisible
- Can be applied to almost any surface powered by Pure Zone by Hexis Health
- ISO 22196 tested and certified

To live, work and play in a 99% microbe free zone, contact us at www.hygienezone.co.za today
